The TER were recalculated according to the new proposal of guidance document on bird exposure calculation.

Toxicity exposure ratios for birds				
Appl. rate (g a.s./ha)	Organism	Time scale	TER	Annex VI trigger
2280	insectivorous b. (early/late)	acute	**2.9**	10
	insectivorous b. (early/late)	short term	*	10
	insectivorous b. (early/late)	long term	**3.0**	5

* bw data were not available. Short term risk is however not expected
